All **Baby Arugula Harvests** in Southern California and Western Arizona are being hindered by climate conditions. This major blow to the supply chain has caused a Baby Arugula shortage industry-wide. Baby Arugula's peppery flavor and delicate texture make it one of our most sought-after baby greens. While Riviera is still able to obtain a limited supply of Baby Arugula we may not have enough to get by.

Don't worry Riviera stocks flavorful and beautiful baby greens of all kinds that you can use on your menu in place of baby arugula. For a similar peppery flavor, B&W Baby Watercress Cleaned & Bagged 1.5lb makes a great substitute.

Riviera stocks both Green or Red versions:

Green Watercress

WATCLE

Red Watercress

WATRED12/3

BABY RED ROMAINE
2 LB
